## INFORMATION

### Easy battery replacement:

The stopwatch has a separate battery compartment, which can be easily opened and closed with a "key" at the cord. (410-493)

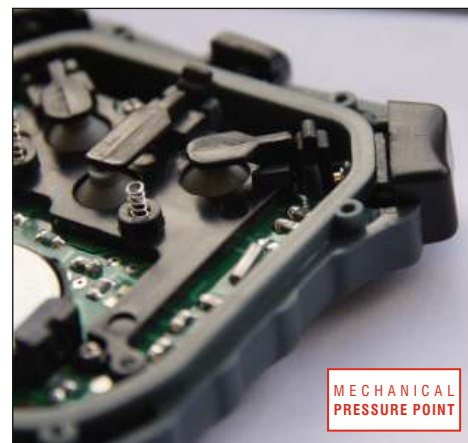

### Adjustment of the start/ stop button:

At the stopwatches 480/485/490/493 you have the opportunity to adjust/ locking the start/ stop button. There can be no undesired termination in time measurements.

### Mechanical pressure point:

The keystroke is transmitted via a lever which creates the electronic contact. Mechanical measurement errors can be excluded in the long term.
